# Wealth Beyond Measure

Voicework, shared sound and song is becoming increasingly popular whether it's the creation of new local choirs, voice workshops, sound healing research, or the X Factor watched by millions every week.

The Naked Voice focuses on the full power and passion of your voice freely expressed, without self-consciousness or fear. This new NV performance training explores the power of shared sound, song and silence to awaken the heart, inspired by devotional chant, sacred mantra, deep non-judgemental listening, healing breath work, energy movement and the magical "seven sounds of love". The focus of the training will be accessing 'presence' or the true spirit of performance.

## Singing Our Way Home!

By the end of the training we will have harmonised and rehearsed a playlist of chants and songs. Singing together in this way will quieten the mind, open the heart and transmit the highest of human values – harmony, co-operation and compassion, elevating the human spirit and uniting our community beyond race or creed.
